# 4.5M COUNTER GUIDE

1

Open and remove all items from the box labelled 'counter frame and clamps'.

2

You will find your counter frame and a small bag that will contain two large clamps and 6 lugs.

3

Standing opposite your partner, take hold of the two corner legs on your side and walk backwards until the frame is fully extended, you will know this when the corner sliding joint automatically clicks into place.

4

Once your frame is fully extended, screw the lugs into each corner of your frame until they are secured tightly.

5

Once everything is secure you can now connect your aluminium runners together. Connect the opposite male & female bars together which gives you two long aluminium runners.

6

There are two pairs of runners; connect the opposite bars together which gives you two long aluminium runners.

# 4.5M COUNTER GUIDE

7

At the end of your aluminium runners there is a small hole, this slots on to the lugs which are attached to each corner.

8

Place your aluminium runners along the long side of your frame making sure the ridged side is facing inwards.

9

This will be in the box labelled 'counter frame top', please unpack and remove items.

10

Once you have applied the aluminium runners, its time to secure your 'counter frame top'.

11

Apply the aluminium slats by placing them on top of the ridges on the aluminium runners and adjust to your desired height setting.

12

You can secure the counter frame to the corner leg on your gazebo using the clamps provided, this adds strength and stability to your counter frame.
