X1

**Awning Material**

X1

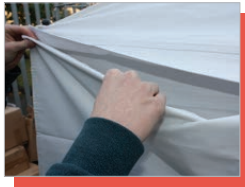

# 3M AWNING GUIDE

1

Firstly, erect your instant shelters as per your instructions. You will notice on the main canopy there is a small velcro flap.

2

Unfold the market awning extender material and velcro this to the small flap.

3

Connect the support bars together and slide through the loop at the bottom of the market awning extender material.

4

Attach clamps to the adjustable corner bars; they are specific shapes that fit either side. Tighten to the leg.

5

Remove the black cap on the end of the corner bar and place through the hole on the main support bar. Loosen the grey plastic clamp by pulling it down, and then pull the corner bar outwards until the material is tight. Tighten the clamp back up. Repeat on both sides and adjust the height if necessary.
