# FLAG GUIDE

1

Remove the contents from the bag.

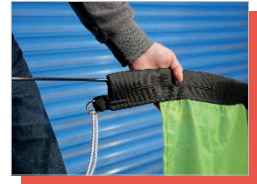

2

Connect the adjoining poles together beginning with the thickest, until you have one long pole.

3

Thread the flagpole through the black elasticated band that runs up the length of the flag.

4

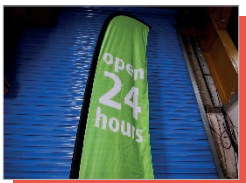

Once the flagpole has reached the top of the flag material, take hold of the bungee cord and secure it over the hook so that the flag is fully stretched out.

5

Once the flag is fully erected, take the bottom of your flagpoles and insert the flag base. Double check that everything is secure.

6

The flag has now been fully erected.
