Sky Banner Tool

X1

Printed Banner

X1

Things You Should Know

- ⤴ Ensure that you do not lift the shelter frame legs up until the sky banner is fully attached and in place.
- ⤴ Where possible, two people should assemble the sky banner.
- ⤴ If your banner material is 2.78m you will need to attach the clamps so that the sky banner holder is facing straight out from the front of the shelter. If your sky banner material is 3m long, you will need to attach the clamps so that the sky banner holder is facing out to the side of your shelter.

SKY BANNER GUIDE

1

The bundle contains two types of clamps, make sure to attach the same clamps to each of the sky banner holders and ensure that they are attached with the screws facing the same way.

2

Attach the sky banner holder to the frame leg while making sure that the open end is facing upwards.

3

Attach the two horizontal banner bars together, these will click into place.

4

Using the sky banner tool, secure one side of the frame bars to an upright support bar.

5

Thread the banner material sleeves over the frame bars and secure the other side to the remaining upright support bar.

6

Once the sky banner is assembled, lift the completed sky banner. Next, insert the bottom of the upright support bar into the open end of the sky banner holder and adjust the height to the desired setting.
